Education

Vellore Institute of Technology, Bhopal
B.Tech. in Computer Science, **CGPA:8.22**

Sept 2022 – Exp.2026

Skills

Programming Languages: C++, Python

Databases: MySQL

Projects

Face Sentiment Analysis | Python

[GitHub](#)

- Built a deep learning-based system using CNNs and OpenCV to classify 7 emotions (Happy, Sad, Angry, Frown, Surprise, Neutral, Disgust) with 85%+ accuracy.
- Performed face detection using Haar Cascades and applied image preprocessing techniques for improved model performance.
- Trained and fine-tuned the model on the FER-2013 dataset to achieve robust emotion recognition in real-world conditions.
- Developed a simple Tkinter GUI for real-time webcam-based emotion detection, applicable in market research, mental health, and HCI systems.

AI based Healthcare Diagnostics | Python, Java

- Developed a smart healthcare chatbot using Python, Java, HTML, CSS, and Flask to provide personalized health diagnostics based on user-reported symptoms.
- Implemented symptom analysis and diagnosis prediction using machine learning models trained with Python scripts on medical datasets.
- Built a responsive web interface using ReactJS and Flask to enable seamless interaction and real-time user query handling.
- Designed for applications in remote health consultation, preliminary diagnosis, and health monitoring systems.

EcoScope | Python, ReactJS

[GitHub](#)

- Developed a web-based application using React, integrated with YOLOv8 for real-time animal species detection from photos and videos.
- Achieved over 80% accuracy in detecting multiple animal species, validated by testing on 50+ images and videos under various conditions.
- Supports both image and video inputs for flexible detection, providing species identification with bounding boxes and confidence scores.
- Designed for applications in wildlife monitoring, ecological research, and conservation efforts.

Extra-Curricular

Social Media Team – Member | D2C Igniters Club, VIT Bhopal

- Strategized and executed digital campaigns for flagship events Vibes and Foragers 3.0, contributing to a 150+ student turnout and increasing event visibility.
- Created and scheduled engaging content across Instagram and LinkedIn, resulting in a 35% increase in reach and a 25% boost in follower interaction.
- Collaborated cross-functionally with media and promotions teams to plan and implement pre-event promotions, helping drive a 20% increase in student attendance compared to previous editions.
- Leveraged social media analytics tools to assess and refine content performance, achieving a 15% improvement in average engagement rate during campaign periods.
