EDUCATION

Vellore Institute of Technology University, Bhopal
B.Tech, Department of Computer Science and Engineering

September 2022 - Ongoing
CGPA : 8.34

TECHNICAL SKILLS

Programming Languages: C++, JavaScript.

Web - Technologies: React, Next.js, Tailwind CSS, Node.js, Express.js.

Database: MySQL, MongoDB, PostgreSQL

PROJECTS

BhashaLearn | Indian Language Learning App | [view project](#)

[GitHub](#)

Tech Stack: React.js, React Native, Expo, Supabase, PostgreSQL, Gemini 2.5 Flash API, Vercel

- Built a cross-platform language learning app (web + mobile) for 12 Indian languages using React, React Native, Expo, and Supabase with authentication, protected routes, and persistent user profiles.
- Integrated Gemini 2.5 Flash API for AI tutoring, dynamic lesson/quiz generation, and real-time answer validation with fallback handling for API rate limits.
- Developed a gamification system with XP progression, badges, streaks, confetti animations, and live leaderboards synced with PostgreSQL.
- Migrated the web app to React Native (Expo), implementing AsyncStorage auth, native speech recognition, TTS, and EAS deployment workflows. Optimized text-to-speech and audio support for Indian languages due to limited browser and platform-level support, and worked on improving compatibility and performance across devices.

MoneyLens | AI Expense Tracker | [view project](#)

[GitHub](#)

Tech Stack: React, Vite, Node.js, Express, Turso (SQLite), Groq API, JWT, Recharts

- Developed a full-stack AI-powered expense tracker with natural language input parsing using Groq's LLaMA 3.3 70B model, enabling users to log expenses conversationally.
- Implemented JWT-based authentication with bcrypt password hashing, ensuring secure user-specific data isolation across a cloud-hosted Turso database.
- Designed RESTful API routes in Express with middleware-based auth guards and integrated Groq API for generating personalized AI financial insights and monthly reports.
- Built a responsive dark-themed dashboard with Recharts visualizations including donut charts, bar graphs, and category breakdowns, deployed on Vercel and Render.

QuickCart | Ecommerce Website | [view project](#)

[GitHub](#)

Tech Stack: Next.js, React, Tailwind CSS, Clerk, Inngest, MongoDB, Node.js.

- Developed a full-stack ecommerce site with role-based access control through collaborative development practices.
- Integrated Inngest for event-driven workflows, enabling asynchronous user and order synchronization with MongoDB
- Designed dynamic API routes in Next.js and implemented secure Stripe payment flows with thorough debugging and unit testing.
- Built scalable MongoDB data models with cart and address management following software lifecycle best practices

EXTRA-CURRICULAR

Social Media Team Core Member | D2C Igniters Club

June 2024 – June 2025

- Strategized and executed social media campaigns for flagship events *Vibes* and *Foragers 3.0*, increasing event visibility and driving 150+ student participation.
- Created content for Instagram and LinkedIn, improving reach and engagement while collaborating with media teams for promotions.

Creative & Personal Interests

- Edit short-form videos and digital content for social media.
- Actively play **chess**, which strengthens strategic thinking and problem-solving skills.
